Hello! 👋

I am...
I have a lot of experience as a Front-End Developer. I am also a creative and
skilled UI/UX Designer.

What I am looking for...
I am looking for a Front-End Developer position. Mainly focused on providing a
great user experience with great a user interface that I could code and
collaborate on its creation.

My strongest skills...
First of all, I specialize in designing for the Internet. I am an expert in HTML
and CSS, including the web accessibility and cross-browser issues on displaying
content in different browsers. I'm also reliable in almost every JavaScript
framework.

One fact (outside of work) about me...
I did a side project with my friend that has over 30 million downloads every
month. Check out here: https://github.com/known-css/known-css-properties

Best regards,
Krzysztof Bebenek
